

NECi Consumer Nitrate Test Kit (Catalog No. C-NTK-101)

The Nitrate Elimination Co., Inc. (NECi) Consumer Nitrate Test Kit (C-NTK) for Home and Farm is safe and accurate because it is based on an enzyme. Measure nitrate in water, fish tanks, juice, septic effluent, lakes and streams – any nitrate source.

STEP 1

Empty the contents of the colored Snap-Cap tube into the Screw-Cap tube with the Colored Dot: This is the Nitrate Standard. Empty the contents of the Clear Snap-Cap into the other Screw-Cap tube. This tube is for your Sample.

Nitrate Standards

Your sample

STEP 2

Add one drop of your sample to the Sample Screw-Cap tube, using the Pipet. Cap both tubes and shake to mix. Set them aside for about 20 minutes. Shake three times as you wait.

STEP 3

After the 20 minute wait, shake both Screw-Cap tubes again. Remove the foil from the Square tubes. Pour the contents of the Nitrate Standard tube (with Dot) into the Square tube with the Dot. Pour contents of your Sample Screw-Cap into the other Square tube. Shake to mix, wait about 10 minutes, then shake again. The Standard should now be pink.

Step 4

You're ready to determine the nitrate content of your sample! See next page for instructions on Evaluation of your results.

Notes: In all steps, complete mixing is important, but precise timing is not necessary. For example, you can perform Steps 1 and 2, and do Steps 3 & 4 up to 24 hours later. The color that you will see after Step 3 is stable for up to 7 days.

DISPOSAL: This kit has been designed to use only nontoxic and nonhazardous materials. Tubes & contents can be discarded.

Limited Warranty: The Nitrate Elimination Co., Inc. (NECi) warrants at the time of shipping, this product was free from defects in the materials supplied in the Nitrate Test Kit. NECi warrants that the reagents supplied will be effective for use in nitrate testing (when used as described above) until the expiration date. Materials used after this date are not warranted to be effective for nitrate testing. NECi will replace defective materials if notified by the expiration date.

Replacement is contingent upon storage of the materials in accordance with the instructions on this package insert. In any case, liability of NECi is limited to replacement of the product, or refund of the purchase price of the test kit.
